DETAILED ACTION

Allowable Subject Matter

Claims 1-18 are allowed.

The following is an examiner's statement of reasons for allowance:

The closest art known to the Examiner is cited on the attached PTO 892 and IDS forms. None of the cited references or combinations thereof disclose or suggest separating each of a plurality of latch bodies from the second surface during movement from the unlatched position to the latched position until the plurality of latch bodies are substantially in the latched position; and applying a clamping force with each of the plurality of latch bodies to the second surface in the latched position effective to secure the substrate against the substrate engaging surface as required by the presently claimed invention. Moreover, the cited prior art does not disclose or suggest moving each of the latch bodies from an unlatched position to a latched position in which the clamping roller assembly of each of the plurality of latch assemblies applies a clamping force to the second surface of the substrate, the clamping force effective to capture the substrate between the latch bodies and the substrate engaging surface, the moving step including maintaining an engagement between the supporting roller assembly of each of the latch bodies and of the plurality of the inclined ramps such that each corresponding clamping roller assembly is separated by a gap from the substrate surface until the latch body is substantially in the latched position. Therefore, the Claims are allowable over the cited prior art. Divisional application 09/911,675, now US Patent No. 6,652,656 is cited to show the state of the art.

Art Unit: 2812

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
